

NFDI4 BIOIMAGE

*Gosh, what a nightmare.
I really need to think about
data management **MUCH**
earlier next time!*

*WHAT? They are asking
for my data for their analysis?
But the naming is kind of not
intuitive ...*

*I will remember the
laser power – I usually
take the same value
anyway.*

*Most of the data is still
on the microscope PC and I
have some on this stick and
there was an external
drive ...*

*I just leave my
images on the microscope
PC. Nobody would delete
anything on there,
right?*

*SHIT, how did I do this
measurement?! I'll just write
'as previously done'.*

*We always use this old
Python script this one postdoc
once wrote for analysis.*

BEEN THERE, DONE THAT.

HENNING FALK
